

Investing in your gas supply

School Wynd area Tayport

SGN
Your gas. Our network.

As part of a wider project in the area, we'll shortly begin our second phase of work to upgrade the gas network in Tayport.

This essential work involves the replacement of old, metal gas mains with new plastic pipe to ensure a continued safe and reliable gas supply.

Following discussions with Fife Council, our work in the School Wynd area started on Tuesday 14 August 2018 and last for approximately 8 weeks. We've split this phase of our project into three sections to help minimise disruption as much as possible.

You'll find further details, such as where we'll be working, overleaf.

We're committed to upgrading our network to ensure we continue to keep homes and businesses safe and warm long into the future. We're using the latest technology to minimise disruption as we replace our pipes in your community.

If you have any specific enquiries about this project, please call **01382 882 930** during office hours (8am to 4pm) or on **0800 912 1700** outside these times.

Where is the work taking place?

We are sorry about any inconvenience our work causes and would like to thank road users for their patience. This is a complex engineering project, however we always aim to minimise disruption whenever possible.

Key

- Section one work area 
- Section two work area 
- Section three work area 

Section one - approximately 4 weeks

The first section of our work takes place in School Wynd from its junction with Whitenhill, Tay Street and Rose Street, to its junction with Mill Lane. Access for residents will be maintained between 6pm and 8am and when safe to do so during working hours.

Section two - approximately 1 week

Our work will then move into Mill Lane. The road will be closed between its junctions with School Wynd and Cowgate, and access for residents and businesses will be maintained via School Wynd or Mill Lane at all times.

Section three - approximately 3 weeks

The final section of our work will be carried out in Whitenhill and School Wynd. The road will be closed between the junction for Whitenhill and Castle Street, and the junction for School Wynd and Green Side Place. The fork junction with Rose Street and Tay Street will also be closed. Access for residents will be maintained between 6pm and 8am and when safe to do so during working hours.

During all three sections of our project, some parking restrictions will be in place in surrounding streets to allow continued traffic flow for motorists following local diversion routes.

Your questions answered...

Q. Why are you doing this work now?

A. We need to replace these old gas mains and while there is no ideal time to carry out the work, the timescales have been agreed with the local council and other interested parties.

Q. How will it affect my local area and travel?

A. Sometimes we need to use temporary traffic lights or close a road to keep the public and our engineers safe while the work is taking place. We'll always provide advance notification if this is the case.

As the local authority always looks to co-ordinate planned roadworks wherever possible, we need their permission to close roads. If our work affects local bus services, this will be advertised in advance too.

Q. How else might I be affected?

A. Some on-street parking in your road may be restricted to ensure certain stages of our work can be completed safely. We'll let you know when this is necessary, as your co-operation in keeping sections of the road clear helps keep our work on schedule.

We may need to take up space in the road or on the verge for a site storage area for our equipment. We'll restore any areas we've disturbed as quickly as possible after the project is finished. We'll also make good all road surfaces, pavements and driveways.

Q. When will you be working?

A. Our hours of work are agreed with the local authority. We will be working five days a week, 8.00am to 4.00pm. We are mindful of those people who live in the area and will try to minimise noisy activities where possible. Whenever possible, we will work extended hours and at weekends.

Q. How can I find out more about the work and how it might affect me?

A. We'll do our best to keep customers informed. After all, the work we are planning is for your safety. We have our established channels, including our website and social media, as well as press releases for local media, update flyers and leaflets such as this one. We would welcome any ideas about other ways we can communicate with you to help raise awareness of what we're doing, such as details of community Facebook pages and independent websites, to which we can supply updates as the work progresses. Please email any suggestions to customer@sgn.co.uk.

You may already know us as Scotland Gas Networks but we've changed our name, logo and branding to SGN. We're still the same company and our local experts are still committed to delivering your gas reliably and keeping you safe.

Every year we give our people a day on company time to team up and work on community projects of their own choice. We are always looking for other projects to complete so if you have any suggestions for your community please call Julie Lowrey on **01689 881 481**.
